2.38 “Construction/Demolition Waste” Definition

Construction/Demolition Waste means waste building materials, packaging, and grubbing waste resulting from construction, remodeling, repair, and demolition operations on houses, commercial, and industrial buildings, including, but not limited to, wood, plaster, bricks, blocks and concrete, and other masonry materials, but does not include asbestos-containing materials, household furnishings, burnt debris, material containing lead-based paint, pressure-treated wood, contaminated solid waste, yard waste or waste tires, and other items listed in subdivision 5.4.a below

5.4. a. General Requirements—Only the construction/demolition wastes approved in the facility permit must be accepted. Prohibited materials include, but are not limited to: putrescible wastes, household waste, automobile shredder fluff, industrial wastes, sludge wastes, liquid paint, including lead-based paint or products coated with lead-based paint, lacquers, solvents, adhesives, cements, sealants, pesticides, aerosols, resin containers, brake fluid, lubricating oil and oil filters, and automotive fluids or fuels, railroad ties, pressure treated wood and engineered wood products, metal wastes (such as piping, wiring appliances, and “white goods”), electrical wastes (such as batteries, mercury-containing switches, ballasts, transformers and capacitors, fluorescent tubes, and computer equipment) carpet and other synthetic flooring material, or other items prohibited by the Class D General Permit Groundwater Protection Plan.
